

Jandy®

BRING YOUR POOL TO THE PERFECT LEVEL

Levolor®
Electronic Water Leveler

Accurate Water Leveling Technology for Any Application

Levolor® water leveling systems electronically maintain water levels in pools, spas, fountains and ponds. It can be used anywhere a constant level of water is needed to maintain a beautiful appearance and protect equipment, especially vanishing edge designs. Installs easily on new or existing pools and spas and does not require structural modifications for installation.

- Easily maintain water level without a hose**
 With Levolor you'll never need to fill your pool with a garden hose. Levolor automatically replaces the water in your pool that is lost due to evaporation and splashing.
- Sophisticated electronics**
 Our unique electronics compensate for waves, will not overfill your pool, and senses the water level without any moving parts.
- Simple installation**
 Since a Levolor System requires no structural modifications, you can retrofit existing equipment systems as easily as you would install for new pool builds.
- Protect equipment & appearance**
 Low water level can cause permanent damage to your pool's equipment. Keep your pool looking and performing at its peak with Levolor.

LEVOLOR ELECTRONIC WATER LEVELING SYSTEMS

WALL MOUNTED CONTROLLERS (110V/220V)

| | |
|-------|--|
| K1100 | Fill Only. Sensor mounts in skimmer or in static pipe |
| K2000 | For vanishing edge/catch basins. Fills and controls a 24V overflow pump relay (purchase separately). Sensor mounts in static pipe |
| K2100 | For ponds & fountains. Fills and controls a 24V relay (purchase separately) to protect equipment from low water levels. Sensor mounts in static pipe |
| K2300 | For DUAL WATER BODY applications, monitors and fills two water bodies independently. Sensor mounts in skimmer or in static pipe |
